DETAILED ACTION

1. In view of the amendment of July 15, 2005, previous rejection on claims 1-16 under 35 U.S.C. 112, second paragraph is hereby withdrawn.
2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

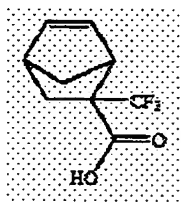

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1, 7-9 and 16 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. In claim 1, in the formula (1), the carbon atom is drawn to have *five* bonds.

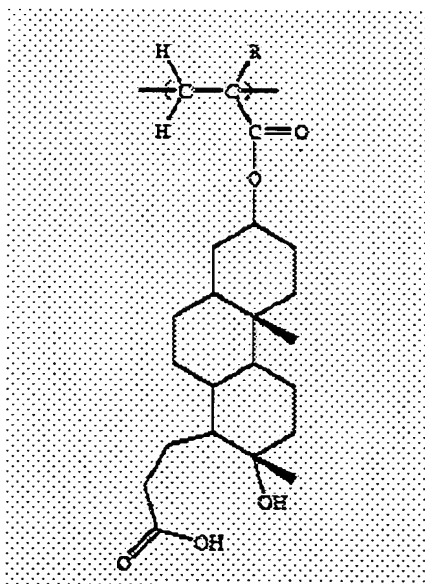

The same problem exists in the formula (1) shown on pg.9 of present specification.

5. Following references are considered to be pertinent to present invention.

Ito et al (US 2002/0146638 A1) teaches the following polymerizable unit:

Ito furthermore teaches the equivalence of the trifluoromethyl group shown above and a hydroxyl group (see [0015]). However, Ito's polymerizable unit shown above in which the trifluoromethyl group is replaced with the hydroxyl group still does not teach present polymerizable unit of the formula (3) because Ito's polymerizable unit does not include the presently required "A" moiety. Takasu et al (US 6,936,400 B2) teaches the following polymerizable unit:

This unit does not teach or suggest present polymerizable unit of the formula (2).
